

Enhanced security for your bank account!

We are reissuing our debit cards to accommodate the new EMV chip technology.

The benefits include:

- New card with a chip for the benefit of enhanced security of your bank account. The addition of the chip reduces the risk of someone being able to steal your information to create a counterfeit card.
- Changed cards to MasterCard and expanded the debit networks to give cards greater acceptance at merchants worldwide.
- We've also given the card a more modern look, making it easier to read.

Alliance
Bank & Trust
